- Always wash your hands when you get home or into work
- Use hand sanitiser gel if soap and water are not available
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- Put used tissues in the bin straight away and wash your hands afterwards
- Try to avoid close contact with people who are unwell

WHAT CAN YOU DO AS COMMUNITY?

Your communities are strong and resilient and there are simple things you can do to help them continue to thrive:

- Taking into account the latest government stay at home restriction on social distancing, speak to vulnerable family, friends and neighbours and make sure they are able to get what they need.
- If you know someone who is self-isolating, contact them via phone and text and check that they're ok. By its very nature, self-isolation is a solitary experience and their wellbeing will likely be improved by talking to someone (an additional form is enclosed to support this)
- Appoint someone in your community/neighborhood as the main gatherer of information so that everyone in your area gets access to the same and most accurate information
- Please be mindful with your comments and actions, so as not to cause undue concern or anxiety within your community. If you hear mis-information that may cause issues, respectfully challenge if you're able to
- Please be respectful of anyone you know who has been diagnosed with COVID-19 as it's likely to be an anxious time for them. Due to patient confidentiality their details will not be publicly confirmed, so please do what you can to respect and protect their privacy, and do not speculate with the local media or on social media.
- PHE has advised people who are self-isolating to do what they can to avoid visitors to their home and any deliveries of groceries, medications or other shopping to be left at the door so please ensure that when you are providing support this advice is followed.
